ABOUT US

The only thing we're serious about is food.

We make the best and serve the best

Description

- Overview:** This project aims to develop a comprehensive restaurant reservation system to simplify the booking process for diners and enhance operational efficiency for restaurant staff.
- Purpose:** To provide a seamless experience for customers to make reservations online and for restaurants to manage those reservations effectively.
- Target Users:** Diners seeking reservations

repellat.

Technology Stack

- **Frontend:** React for building dynamic user interfaces.
- **Backend:** Express.js for handling server-side logic.
- **Database:** MongoDB for storing user and reservation data.
- **Tools:** Git for version control, Postman for API testing, and additional tools as needed.
